PROFESSIONAL SUMMARY

MBA Finance graduate with hands-on experience building 3-statement, DCF and cash flow models from raw financial data. Skilled in assessing leverage, liquidity and debt servicing capacity using Debt/EBITDA, Interest Coverage, cash burn and runway, and in calculating the true cost of venture debt using XIRR. Keen to build a career in venture debt, private credit and startup financing. Available to join immediately.

EXPERIENCE

Independent Financial Analyst (Projects) — Pune, Maharashtra
June 2026 – Present

- Calculated the true cost of a 14% venture debt offer at 18.8% XIRR after fees and warrants, measured founder dilution, and structured an equivalent no-warrant loan at 17.3%.
- Analyzed Ola Electric's cash burn and runway using FY26 and Q1 FY27 financials, assessed leverage and liquidity, and evaluated whether its ₹780 Cr QIP or debt funding suited it better.
- Analyzed annual reports of listed companies to assess leverage, interest coverage and cash flow strength, summarizing findings in short credit-style notes.

RK Advisory & Training — Pune, Maharashtra
Equity Research Analyst Intern — Nov 2025 – May 2026

- Built cash flow models tracking Debt/EBITDA, Interest Coverage and free cash flow to assess the debt servicing capacity and liquidity of listed Auto sector companies.
- Built 3-statement, DCF and relative valuation (P/E, EV/EBITDA) models for 3 listed Auto OEMs (Maruti, TVS, Bajaj) using 9+ years of actuals and 5-year forecasts.
- Prepared weekly Auto & EV sector research notes and monthly sales updates from SIAM data and company press releases, presenting findings to a senior analyst in weekly reviews.

Fin-Tech Education — Pune, Maharashtra
Stock Market Trainee — Jan 2024 – Jul 2024

- Counselled 50+ prospective students on stock market and trading courses, explaining course content, trading and options basics; achieved a 20% enrolment conversion rate through relationship-driven outreach.
- Used Excel and ratio analysis on listed company financials to prepare examples for student counselling and demo sessions

PROJECTS

- **Maruti Suzuki – 3-Statement Model & Initiating Coverage (FY17–FY31**): Built a fully linked P&L, Balance Sheet and Cash Flow model with FY17–FY26 actuals and FY27–FY31 forecasts. Performed DCF and relative valuation and initiated coverage with a BUY rating (target price ₹15,400). Extracted and reconciled segment data from 9 annual reports.
- **India Auto Industry Sales Tracker (OEM-Wise**) – Built and maintained a 19-sheet Excel database tracking monthly sales and segment data across 9 major OEMs; used as the main data source for monthly industry reports.
- **TVS Motor Company** – Equity Valuation Model – Built 16-sheet model with 3-statement forecasts, DCF, and relative valuation; initiated coverage with HOLD rating on the stock.
- **Ola Electric – Cash Runway & Funding Analysis**: Calculated cash burn and runway using FY26 and Q1 FY27 financials, analyzed leverage and liquidity, and assessed why the company raised ₹780 Cr via QIP in 2026 and whether equity or debt suited it better
